

Subject	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
Year 10	Component 3: Construction & Design	Component 3: Construction & Design	Component 3: Construction & Design	Component 2: Construction in Practice	Component 2: Construction in Practice	Component 2: Construction in Practice
			Component 3 Assessment			Component 2 Assessment
	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology
Year 11	Component 3: Construction & Design	Component 3: Construction & Design	Component 3: Construction & Design	Component 2: Construction in Practice	Component 2: Construction in Practice	Component 2: Construction in Practice
			Component 3 Assessment Retake			Component 2 Assessment Retake
	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology	Component 1: Construction Technology
			Component 1 Assessment			Component 1 Assessment Retake

Component 1:

This component will develop knowledge and understanding of processes, terminology and technology used in the construction of the built environment.

Component 2:

This component will introduce learners to commonly used hand tools, equipment and craft skills needed in the creation of the built environment and how to select and use materials in order to safely produce quality outcomes.

Component 3:

Learners will gain an understanding of clients' needs and develop skills in producing building design briefs and sketches that consider construction constraints.
