

Dear Parent/ Carer

A study on developmental milestones in toddlers, preschool and primary school aged children.

I would like your help with a research study. I am a third-year developmental psychology student from the UEA BSc Psychology programme, and I am currently carrying out my research project about developmental milestones in children. I want to include parents in my research as I am interested in your intuitions about the ages of development.

I am asking you to complete a short, 15-minute online questionnaire. You will be asked some demographic questions and given six scenarios. You will be asked at what age you think the average child becomes able to give the correct answer in each scenario.

If you take part, you will be given the option to enter a prize draw for the chance to win a £25 Amazon voucher.

If you decide to take part in the study, simply click the link below or enter it into a browser and you will be taken to the questionnaire, where there is more information about the study. Please feel free to pass this information on to any other parents who you feel may be interested in participating!

Thank you for your help

Yours sincerely

Suzy-Marie Woodward
