

Exploring Our Local Area: Home Learning

The Discovery Learning for this term is all about **the history of the local area**. As part of the home learning, you are tasked with completing much larger pieces of work, which may take a few weeks to complete. You can decide what order you complete them in and how, however, you must still aim to complete one challenge per week. Please bring in a copy of what you complete or send in a copy to our class Dojo page. Any questions, please let me know.

Local Landmark

Explore a local landmark, creating a mini fact file about it.

This can be made using Google Slides, on paper or as a film.

Local Film Festival - Short Film / Animation

Create a short film or animation for our own Film Festival.

The film can be about anything you like but needs to be appropriate to be shown to the other children in the school

We'll screen the films at the Burnham Overy Art exhibition in July. If you need support in making the film, feel free to use the film club at school to support your filmmaking skills, planning and preparation.

Try and limit the length of the film to no longer than 5-minutes (2-minutes is best)

Local Business: Logo Design

Explore a local business in the area - investigate what they do and who their customers are.

Design a new logo for their business - explain why you made the design choices that you made.

Our School at 70!

To celebrate our school turning 70 years old, see if you can find a former student from the past 70 years - interview them about their experience of the school. Key questions to ask:

What was the school like when you started

What was your favourite lesson and why?

What's a good memory you have of the school?

How has it changed since you were at school?
