

Reteach Week

Closing Gaps. Addressing Misconceptions. Raising Achievement

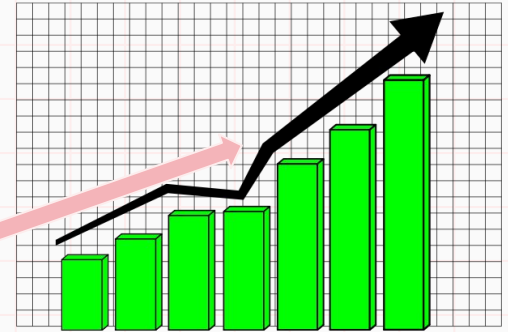

Why are we having a reteach week?

Your assessments are a really good way of finding out how well you are doing at this stage in your education... which is great!

BUT... they are even better at telling us:

1. Where you have gaps
2. Where you have misunderstood something
3. How to get better

They allow us to jump to the next level of achievement!

+ %

We do... You do...

What we do together

- Look at common mistakes
- Look at common misunderstandings
- Dedicate class time to reteaching and improving our knowledge

What you do independently

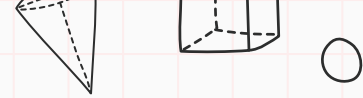

- Look at your mistakes
- Look at your misunderstandings
- Dedicate home learning time to improving your knowledge.

**The best is
when we are
together.**

Why aren't teachers talking grades?

You may well know, but grades are fictional! They don't exist until all the results are in. There isn't anyone who is able to tell you what grade you achieved on a PPE.

Why? Because grade boundaries change each year dependent on how well everyone else in the country your age does!

Imagine it this way →

 + %

How do grades and grade boundaries work?

I only have a certain amount of donuts. I'm not allowed to buy anymore donuts.

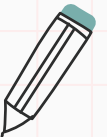

I can't give them to everyone who scores more than 20/25 on my test, because I might end up with more students than donuts.

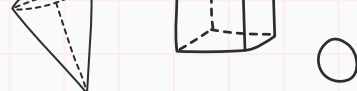

So instead... I'm going to give them to the 6 of you that score the highest.

Yum!!!

**At Hellesdon High School we
don't ask...**

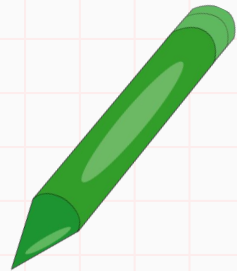

“How do I get the next grade?”

We ask...

**“How do I get more
marks?”**

“How do I get more marks?”

📎 + %

Use your reteach week to focus on improvement.

In class, you'll use green pens to address those gaps.

At home, you should use Seneca, revision guides and youtube to improve.

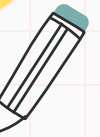

"How do I get more marks?"

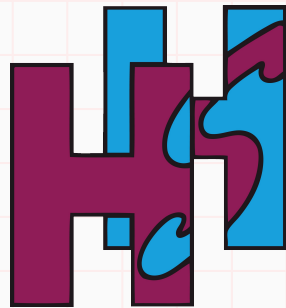

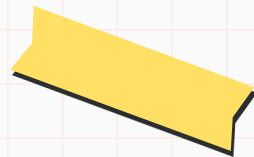

At the end of the week,
ask yourself:

*If I was to sit the paper
again today, how many
more marks might I get?*
