

## **This week we have:**

- In Maths, Year 1 are learning about 3D shapes, we have learnt their names and recognising them in real life objects. Year 2 have been using their subtracting skills to solve word problems.
- Year 2—English— We are so impressed with the children’s amazing singing and learning of lines. Well done Year 1 and 2!
- In Computing, we have been using the laptops to continue learning how to create a winter scene using j2e paint tools.
- In Geography, we have learnt there is a Norfolk in the USA. We have compared both Norfolk’s physical and human features, thinking about what is the same and what is different.

## **Things to do at home:**

Year 1—Can you spot 3D objects at home? What shape is your fridge? Are there any spheres in your garden?

Year 2—Practice counting in 2s, 5s and 10s—forwards and backwards.

Hi-vis Jackets—these should be worn by children, to and from school, everyday. They are part of our winter school uniform. Please speak to a member of staff if your child cannot find theirs.
