Year 1 and 2 Newsletter

20th November 2026

Dates to remember:

Beetles only – Forest School on Fridays

This week:

- In English, Year 2 have been learning about **suffixes** and adding these to words in their writing, such as: es – fox**es ,** s – cat**s ,** ly – close**ly.** Year 1 have been using the **pronoun** 'she' and using this in a sentence.
- Science this term is all about animals! This week we have learnt about amphibians, reptiles and fish. We can name a variety of basic animals from these groups, and exploring what makes the animals in these groups different. One things they all have in common is that they are cold blooded animals.
- In Geography, we have been exploring the difference between a village and a city. We know villages are much smaller, have a lot less buildings and people. Cities are much bigger and busier, with lots of transport, buildings including shops, restaurants and homes that are closer together.

Things you can do at home:

Y1 – practice writing those *teen* numbers
(making sure digits are in the right order and formed correctly!)

Y2 – practice spellings from your spelling folders. Can you read the words and use them in a sentence? Can you write the words?

Don't forget to read **<u>at least</u>** three times a week.
This is so important for developing fluency and embedding their skills from our phonics lessons!
